User Support Coordination and Tools

Our goal is to provide a harmonised approach in dealing with users of our patent information products and services

- by offering the best possible service for our users
- ensuring the user experience is the same across products and services

Technical information
We provide access to the largest single source of technical information in the world: our databases containing millions of patent documents. This allows you to see what already exists, find out about technical aspects of your competitors' work or spot trends in technology.
Legal information
Discover the potential of the EPO's legal patent information: see if and where a patent has been granted, if it is valid, if there is still time to challenge it, and much more.
› Legal information
Business information

Bulk data sets

Print | Share

The EPO's bulk data sets are bulk extractions from EPO-internal patent databases made available to external users for further processing. They are structured and standardised collections of data.

Here's an overview of the bulk data sets we offer:

- **EP bibliographic data (EBD)**
- **European Patent Register data**
- **EP full-text data**
- **EPO worldwide bibliographic database (DOCDB)**
- **EPO worldwide legal status database (INPADOC)**
- **First-page images**
- **Sequence listings**
- **National full-text data**

The EPO's bulk data sets are also referred to as "raw data products" or "EPO databases".

To find out which product best suits your needs, have a look at this table.

If you are interested in using raw data to conduct statistical analyses, please take a look at our PATSTAT page.

Other useful resources are:

- **our download page for free resources and public files**

Make the most of the EPO's knowledge and expertise with our online training material on patents and the European patent system.
Learn at your own pace and in your own time
We offer a wide range of online learning material on the following topics:
Searching for patents
Applying for a patent
Patent law & practice
Intellectual property in business
› Browse our e-learning centre
Sign up for one of our live online courses
Our online courses are designed for anyone interested in learning about search, classification, opposition and other patent-related topics. There are two types of courses: tutored courses and self-paced courses. Tutored courses have a timed pace, and often offer webinars or forums where you can chat with our experts; self-paced courses are freely accessible 24/7, allowing you to learn at your own pace and in your own time.
Visit the Academy's e-learning centre to register for a tutored course or enrol on a self-paced course.

EPO Patent Information Conference
The EPO Patent Information Conference takes place each year in a different EPO member state. It features break-out, training and discussion sessions for both new and expert users of patent information.
It is a unique opportunity to:
– hear about the issues and trends affecting your profession
– network with your peers
– meet EPO patent information experts
– find out about the latest developments and the EPO's future plans
– discover products and services from patent information providers exhibiting at the event.
Learn more about the EPO Patent Information Conference 2018.
Training
Whether you are a beginner or an advanced user of patent information, you will find a training course that meets your needs. Most of our online training courses and webinars are free of charge.
To see what's available, take a look at our forthcoming classroom training courses and webinars.
If you're looking for expert guidance to help you with your patent searches, we offer a number of useful resources. Check out our list of online tutorials.
Training on request
Contact us to find out more about course content and costs, the availability of trainers, and everything you (and we) need to know to ensure a successful training event.
Patent Information News
Published in English, French and German
This is a quarterly publication reporting on developments in patent information. It covers news about data, tips on Espacenet and other services, and much else besides.
You can subscribe to e-mail alerts letting you know when a new issue appears and download past issues on our Patent Information News page.

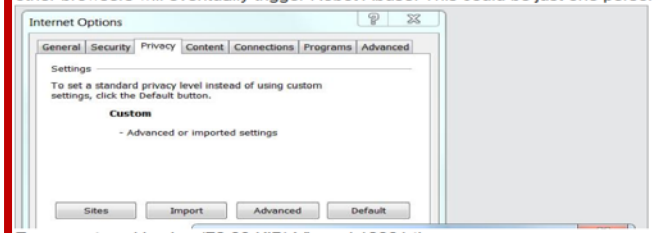
2. Espacenet cookies are disabled
Solution: Please ensure that cookies are enabled. If cookies are blocked from this screen, MS Office and other browsers will eventually trigger Robot Abuse. This could be just one person in an organisation



Espacenet cookies.jpg (70.89 KiB) Viewed 10861 times

3. You are using automated tools that are accessing Espacenet without a session.
Solution: Please refrain from using all automated tools or third party software. Direct access to the data by any automated means, such as a macro, will cause rejection messages to be sent. In order to avoid rejections in future – you may like to check whether our Open Patent Services (OPS) could be an alternative tool for your data retrieval. Open Patent Services (OPS) provide web services for machine-to-machine queries that deliver production stable patent data from the EPO. For more information, please see the dedicated: **OPS FAQs** .

Error message: The Espacenet application has found that requests from your IP address may be in violation of our fair use charter

This could be because of:
1. Excessive data retrieval or document downloads
Solution: If our systems have detected that you have been loading too much data or documents in a short period of time, your IP address will be blocked for 24 hours and released automatically.

2. There are numerous users behind the IP address
